

LAUWERS
BOROBOS

AL : elevator at the back with 2 or 4 forks, platform 1,3m long

AL, with standard conveyor belt 1 m long, can be turned to the side or to the back

ALC, almost the same frame as AL, but shorter = weight of pallet closer to the tractor. Elevator on the back with 2 or 4 forks.

ALC, short frame = weight of machine and pallet close to the tractor. Platform 1,1 m long.

AL + RASSPE, with extra big platform and enough space for a Rasspe tying machine. Elevator on the back with 2 or 4 forks.

AL + RASSPE, with extra big platform and enough space for a Rasspe tying machine. Elevator on the back with 2 or 4 forks.

ZL, left wheel can be twisted to reduce the width of the machine on the road

ZL

ZLX with elevator that can lift 1 m high, inclinable forks, to load pallets directly on a trailer

ZLX, platform folds upwards by hydraulics

ZLX, PVC belt can be turned to the back for big plants and to the side for seedlings

Lifting blade and shaker (the same for all models)

custom made machine with bunker for small christmas trees
