biuro@artagropolska.pl

Product name: **Teracryl**

Product description:

Cross-linked potassium polyacrylate, liquid adhesive

- glutinous liquid
- colour: white to beige
- complete biodegradation: after 10 years
- pH 6-8

Application:

The product glues (binds) loose and powdery materials, and prevents water and wind erosion of soil.

Method of use: mix with the material (soil) or spray diluted 1:1 to 1:10.

Specific properties:

Adhesive used in natural environment (hydroseeding, preventing water and wind erosion), as well as in industry for binding loose and powdery materials (e.g. fly ash).

Storage:

In closed containers i.e. barrels, cans.

Safety measures:

The product is non-toxic. In case of contact with mouth or eyes rinse with plenty of water.

Shelf life:

If properly stored, the product is durable.

Detailed product information included in the product safety sheet may be obtained from the producer.

Technical consultation:

Product data sheet does not allow to include all product details regarding its use and effects. In case of any doubts please contact with the producer. We will gladly provide you with advice and answer all your questions regarding the product and its applications.
